Notes

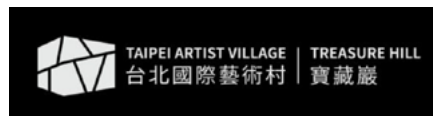

Digital poetry in virtual reality

Immersive and interactive environment

By weaving imaginaries in the mode of biomimicry, *N-h9* is an immersive poetry experience that attempts to develop notions of interrelationships between humans and non-humans.

Approximate duration : 20min

With the support of Région Occitanie / Pyrénées-Méditerranée
and Taipei Artist Village

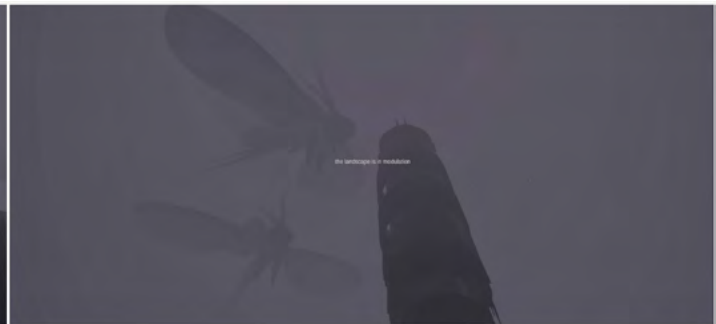

Synopsis

Interconnected landscapes

The atmosphere, lunar and misty, is studded with fireflies. These fireflies are extremely mobile, at the limit of the visible. Evanescent, almost beyond the image - it is a multitude of evanescent, multi-form beings developing into a kind of entirely shifting space with an unpredictable future. These element-beings are interchangeable, declinable and infinitely modifiable. Each of these beings is a mobile, permeable and reversible unit : one part of the whole, the whole, the other part and the reverse.

Mutate/Regenerate

The aim of *N-h9* is to allow to be immersed in a state of sensory modifications (and/or mutations) in order to construct interconnected landscapes by imagining a living world - made up of beings and the relationships between these beings.
